which is --.

IN THE CLAIMS

Please cancel claims **2-158**, before calculation of fees and without prejudice to further prosecution.

Please add new claims **159-182** as follows:

4/20
-- 159. A method for producing an extended wear contact lens, said contact lens comprising a core polymeric material which has a high oxygen permeability and a high ion or water permeability, which method comprises the steps of:

- SUB*
C1
- a) preparing a lens formulation comprising an oxyperm polymerizable material selected from the group consisting of siloxane-containing macromers, siloxane monomers, fluorine-containing macromers and fluorine monomers, and an ionoperm polymerizable material selected from the group consisting of acrylates, methacrylates, polyalkylene glycols and N-vinyl pyrrolidones, wherein said oxyperm polymerizable
